I have been following your social media portal and keen to apply during my internship. I am pleased to be applying for the intern architect position. I am certain that my qualifications and qualities make me viable for this role. It would be an opportunity for me to learn new things and further develop my expertise and grow both personally and professionally.

I am a fourth year architecture student at Dr. D Y Patil College Of Architecture. During my studies, I have worked on multiple individual and group projects at student as well as professional level, which has trained me to function productively in paced and deadline-driven environments. Moreover, at the college, I have also served as an associate digital head and class- representative and these valuable experiences have played a crucial role in the development of my excellent digital and management skills.

On top of my education, I have also been associated as an intern architect at Kalakruti Engineers for the last one and half years. Till now I have worked on over 20+ projects and been part of designing multiple commercial, residential, and recreational projects, and I was engaged in delivering 3d renders, planning, interior design, and site executions as well.

Thank you for your time and consideration and I look forward to speaking with you in the near future.

Thank you,
Binoy Thacker
