ABOUT ME

Travelling to different places in India , I would feel & touch more & more materials or buildings . Growing up in the city of Ghaziabad to the outskirts of Delhi , Looking at the houses , the streets , & all the historical monuments motivates me to fulfil my dream of becoming an architect with the passage of time Google almost came to assume a role as my virtual mentor in the phase of developing a sense of design . By creating 3D models , Hand-made models & sketches beside other objects of everyday life ; It started realizing that a structure & design should not only be aesthetically appealing but also serve a purpose from functionality & practicality point of view . And seemingly that hinted at the direction of any future education & career path .

HOBBIES

TECHNICAL SKILLS

OBJECTIVE

The objective is to join a firm to maximize my learning experience & contribution towards the organization . To pursue an opportunity to gain knowledge of the new concept & design ideas & exposure towards the field work . My contribution will be an asset to the firm through my dedication , hard work & keen nature of learning .
