 /\_alefiyaa/

Since a young age, I have enjoyed being artistic and creative, being able to create gives me an escape. I love art and culture in every aspect and have a keen interest in exploring the human interpretations of it.

With Architecture I knew I found a place where I belong. I believe Architecture shapes society and helps us observe our surroundings in a more articulate manner. With every opportunity that came on my way along with this field, made me appreciate the raw beauty around better.

As an undergraduate Architecture Student I am seeking a place where I can take this practical training as an opportunity and as a platform to learn the design process and how it is being translated sensitively. I would like to work with utmost professionalism, dedication. I want to maximise my knowledge in all the aspects of architectural design and try to contribute as much as I can for the firm.
