

KRITIKA MONDAL

28 . 10 . 1999

A zealous oriented architecture student, currently In 5th year, looking for an opportunity as an Intern in an Architectural firm, which provides an Inspiring and absolute dynamic work culture.

For me, Architecture is all about observing and compelling the surrounding we are in right now. One of the principle I aim to achieve in my designs is **"FORM FOLLOWS NATURE"**;

which is inspired and modified by one of the greatest designer in the world.

Born in the city of Taj, I always related my ambience to marvelous structures and landscapes. Brought up in different states, living in various cities designed my focus on variety of culture and habitat, which promotes my ability to fit in new place while embracing the heritage. The sharpness of solidarity and leadership has been developed after heading various tasks in college and school, which assisted me to handle situations and work without hesitation in every environment.

Hence, I believe in bright perception towards the tasks leading to hardwork for the excellence.
